Fresh Look for the Halls of Big Picture

Student-Led Pick Me Ups

401 Students Lead Pick Me Ups

The Pick Me Up activities this week were led by our 401 students. The week started with Patrick Dake led an activity where students worked in groups of 10-15 students in an elimination style game. Veronica Hernandez and Jennifer Reynolds organized a scavenger hunt and Kyle Kardysauskas and Nick Santa Maria organized physical fitness game in the gym. The purpose of doing this is to help students get involved in a leadership role in the program. We saw some great examples of students being leaders among their peers this week!

Did you know?

- ➔ Big Picture runs on 13-week trimesters.
- ➔ Students work on an Independent Project of their choosing each trimester.
- ➔ Student-led conferences called Exhibitions are held at the end of each trimester.
- ➔ Students receive a Narrative Report on their progress in every subject including their Independent Project and Internship each trimester.

Thanks to our hard-working Buildings & Grounds crew, Big Picture has started the process of sprucing up the place.

The walls of our hallways received a fresh coat of paint. The new paint brightens our halls and is an improvement in the overall condition of the school. The next steps of the revitalization of the program will include classrooms being painted, student art permanently installed and some signs letting you know you are in the Big Picture area of the school.
