One student at a time.

Pick Me Up

Ms. Pritchard focuses on perseverance

Ms. Pritchard led the Pick Me Up sessions this week. It started with a focus on perseverance. Students heard stories and saw videos that provided examples of how others have persevered in life. This included an inspirational video where athletes talked about how they never gave up on achieving their goals and dreams. This message was well received by our students who are athletes and sports fans. Ms. Pritchard also showed some videos about a dog who tries to catch food that is thrown to him but misses most times. The message is that he never gives up and thinks he will be successful overtime. This kind of optimism and confidence is what is needed to persevere in life.

The students used the remaining Pick Me Ups to create artistic examples of themselves which will be used in displays for the Big Picture Program. One example is the display of each student's art on a school house in the hall. As each student begins an internship, they will move their effigy to show they are out in the community!

Cheers for Peers

Positive Recognition

Mrs. Phillips set up our Cheers for Peers bulletin board in the Pick Me Up room. Students will write down the good things they see their peers doing and post it on the board.

Ltl Begins

Students began their Learning through Internships (Ltl) this week. We had three students start their internships and several others shadow for an internship opportunity. Congratulations to Caleb, Lincoln and Veronica for being the first 3 out there!
